

Vidya Ganapati

Graduate Institution: University of California, Berkeley

Location: Berkeley, CA

Graduate Discipline: Electrical Engineering

Hometown: Portland, OR

Research Interests:

I'm interested in renewable energy, especially photovoltaics. I hope to work on nanostructures for applications in solar energy conversion.

About me:

I completed my undergraduate studies at MIT, majoring in Electrical Engineering, and participating in research at the interdisciplinary Laboratory for Photovoltaics. I'll be starting as a Ph.D. student at the University of California, Berkeley this fall, in the Electrical Engineering department. I spent the summer after junior year working at the Fraunhofer Institute for Mechanics of Materials in Halle, Germany and the previous summer working at the IBM Almaden Research Center in San Jose, CA. I enjoy photography, ice skating, bicycling, and scrapbooking.
