

Andrew Hoover

Graduate Institution: Harvard University

Location: Cambridge, MA

Graduate Discipline: Chemistry

Hometown: Timonium, MD

Research Interests:

Invention of new organometallic chemistry to enable catalysis of reactions that are currently impossible.

About me:

I am currently a first year graduate student at Harvard University in the research group of Tobias Ritter. I received a BS degree in chemistry at the University of Illinois, where I investigated Lewis base catalysis and the properties of chloronium ions with Scott Denmark, and DNA-catalyzed RNA ligation with Scott Silverman.
