

Sam Mullin

Graduate Institution: University of California, Santa Barbara

Location: Santa Barbara, CA

Graduate Discipline: High Energy Physics

Hometown: Huntington Beach, CA

Research Interests:

I am interested in high energy physics. I worked on an analysis with the BaBar collaboration at SLAC (SLAC National Accelerator Laboratory, formerly the Stanford Linear Accelerator Center) as an undergrad. Last summer (2010) I started working on CMS at CERN.

About me:

I received a B.S. in physics and in applied math (for physics) from UC Riverside in June 2010. I started grad school (for physics) at UC Santa Barbara in fall 2010. After I earn my Ph.D., I hope to eventually find a position as a physics professor. I am an avid reader. Most of the books I read are science fiction and fantasy. I also enjoy playing video games—epically fantasy RPG's. When I get the chance, I also like hiking, camping, and backpacking.
