

Alexander Palmer

“Alex”

Graduate Institution: University of Chicago

Location: Chicago, Illinois

Graduate Discipline: High-Energy Physics

Hometown: Dallas, Texas

Research Interests:

I am primarily interested in experimental high-energy physics. As an undergraduate, I worked on an analysis with the BaBar collaboration investigating associated production of charmed baryon pairs. I was also able to intern at CERN where I worked on the ATLAS high-level trigger.

I am also interested in the area of cosmology and hope to explore this topic more in graduate school.

About me:

I am currently preparing to enter the University of Chicago as a first year graduate student in the fall. After graduate school and ensuing post-doc(s), my long-term plans are to stay in academia as a professor and researcher. I am an associate member of Sigma Xi, a Goldwater Scholar, and my hobbies include running, swimming, biking, traveling any time I can, and cooking.
